Professional Profile

Security professional with 20 years of experience in administrative and security operations supporting government contracts, including an active Secret clearance.

Having spent two decades operating within some of the most security-sensitive environments, I bring a deeply ingrained security-first mindset that goes beyond checklists and compliance — it is how I think, plan, and execute. Where others learn security as a technical layer, my perspective was shaped from the inside out: understanding how breaches happen, how policies are stress-tested in the real world, and how people and processes can be both the strongest and weakest links in any system.

I am now channeling that operational depth into cloud security engineering, actively building hands-on technical skills to complement an instinct for risk, confidentiality, and threat awareness that only comes from decades of protecting what matters most.

Professional Experience

EMT / Armed Security Officer

Jul 2014 – Present (11 yrs 10 mos)

Chenega Security SBU (Government Contract)

- Safeguard high-security worksites by upholding the core principles of **Confidentiality, Integrity, and Availability (CIA Triad)**.
- Implement and enforce stringent **Access Control** measures, security badging, and facility monitoring to ensure asset protection.
- Maintain vigilant surveillance through physical patrols and advanced security camera systems to uphold operational integrity.
- Leverage crisis management and de-escalation skills as an EMT to deliver lifesaving interventions and manage emergency responses.
- Utilize **Active DoD Secret Clearance** to operate within high-stakes environment focused on risk assessment and site safety.

Security Biometric Officer

May 2012 – Jun 2014 (2 yrs 2 mos)

Vectrus (Government Contract) | Camp Pratt, Afghanistan

- Oversaw administrative and technical functions for the **Biometric Automated Toolset System (BATS)** to secure military installations.
- Collected and processed sensitive biometric data (eye scans, fingerprints, and photographs) to ensure accurate identity verification for facility access.
- Maintained data integrity and confidentiality by enforcing strict management protocols in compliance with privacy laws and high-level security standards.
- Troubleshot biometric devices and advanced software to ensure 100% operational readiness for mission-critical identification processes.
- Demonstrated meticulous attention to detail in high-stakes environments, contributing to the overall security posture of the installation.

Production Control Manager Mar 2011 – Apr 2012 (1 yr 2 mos)
Sallyport (Government Contract) | Al Udeid Air Base, Qatar

- Streamlined command and control center operations, serving as the primary technical and administrative point of contact for military and civilian stakeholders.
- Delivered hands-on IT support, including assembling and configuring hardware, installing software, and troubleshooting system issues to maintain office infrastructure.
- Managed mission-critical work orders and tracked project lifecycles using the **Integrated Work Information Management System (IWIMS)**.
- Optimized workflows for emergency, routine, and urgent requests, ensuring high availability and service standards for base operations.
- Provided leadership with data-driven insights into productivity and efficiency through precise tracking and reporting of ongoing projects.

Technical Projects & Labs

I maintain an active **App Hub** and a collection of GitHub repositories where I document my journey in Cloud Security Engineering.

Interactive App Hub

A centralized landing page for my live web-based applications and security labs.

Launch App Hub →

Infrastructure as Code

Building secure, scalable AWS environments using **Terraform**.

View Repo →

Containerized Security

Deploying cybersecurity tools via **Podman** on Red Hat Enterprise Linux.

View Repo →

Ansible Automation

Automating system configuration and preparing for the **RHCE** certification.

View Repo →

Education & Certifications

Red Hat Certified System Administrator (RHCSA)

Red Hat

Issued Apr 2026 • Expires Apr 2029

Credential ID: 260-048-996

AWS Cloud Quest: Cloud Practitioner

Amazon Web Services (AWS)

Issued Nov 2025

CompTIA Security+ ce Certification

CompTIA

Issued Jun 2025 • Expires Jun 2028

B.S. Cyber Security Management and Policy

University of Maryland Global Campus

Graduated 2023

Current Objectives

Actively seeking internships, volunteer opportunities, and junior security roles to apply 20 years of operational discipline to modern IT infrastructure.

Driven by a passion for building, I dedicate daily effort to hands-on projects that sharpen my cloud and security engineering skills. Current work includes containerized cybersecurity tooling via Podman on Red Hat Linux, exploring OWASP, Kali Linux, and Splunk through container environments, and building Infrastructure as Code using Terraform on AWS. I am also actively pursuing my RHCE certification with Ansible. Every project is tracked and publicly available on my GitHub portfolio — reflecting a consistent, self-directed path toward a cloud security engineering career.

Contact & Connect

I am actively seeking new opportunities and professional connections. Let's discuss how my 20 years of operational experience and cybersecurity policy background can benefit your team.
